

EXPERIMENT 26 : FFREQUENT PATTERN MINING USING FP GROWTH THROUGH WEKA TOOL

The screenshot shows the Weka Explorer interface with the FP Growth algorithm selected. The 'Associate' tab is active, and the 'FP Growth' algorithm is chosen. The 'Run information' window is open, displaying the following details:

- Scheme: weka.associations.FPGrowth -P 2 -I -N 10 -T 0 -C 0.9 -D 0.05 -U 1.0 -M 0.1
- Relation: supermarket
- Instances: 4627
- Attributes: 217
- Attributes omitted: [list of attributes omitted]
- Associator model (full training set)
- FP Growth found 16 rules (displaying top 10)

The 'Run information' window also shows the following configuration options:

- delta: 0.05
- doNotC: Iteratively decrease support by this factor
- findAllRulesForSupportLevel: False
- lowerBoundMinSupport: 0.1
- maxNumberOfItems: -1
- metricType: Confidence
- minMetric: 0.9
- numRulesToFind: 10
- positiveIndex: 2
- rulesMustContain:
- transactionsMustContain:
- upperBoundMinSupport: 1.0
- useORForMustContainList: False

The 'Result list' on the left shows the top 10 rules found by the FP Growth algorithm. The 'Status' bar at the bottom indicates 'OK'.
